Business  
Applications

### DO YOU WANT TO ...

- ... **share** documents in a secure way?
- ... **collaborate** with external business partners?
- ... **open** your business applications outside of your organization?
- ... **go beyond** the requirements of heavy and constraining SSO-type (Single Sign On) projects?

“ The extended enterprise needs to evolve its identity and access management (IAM) strategy. The rapid adoption of mobile devices and cloud services together with a multitude of new partnerships and customer-facing applications has extended the identity boundary of today's enterprise. It's about the ability to oversee access by a variety of population, from employees to partners, while protecting a variety of sensitive resources. ”  
*(Eve Maler - Forrester Blog)*

Apitech 113 rue Marietton 69009 Lyon - FRANCE  
+33 (0)4 78 43 49 30 | [www.apitech.fr](http://www.apitech.fr)

## YOUR BENEFITS

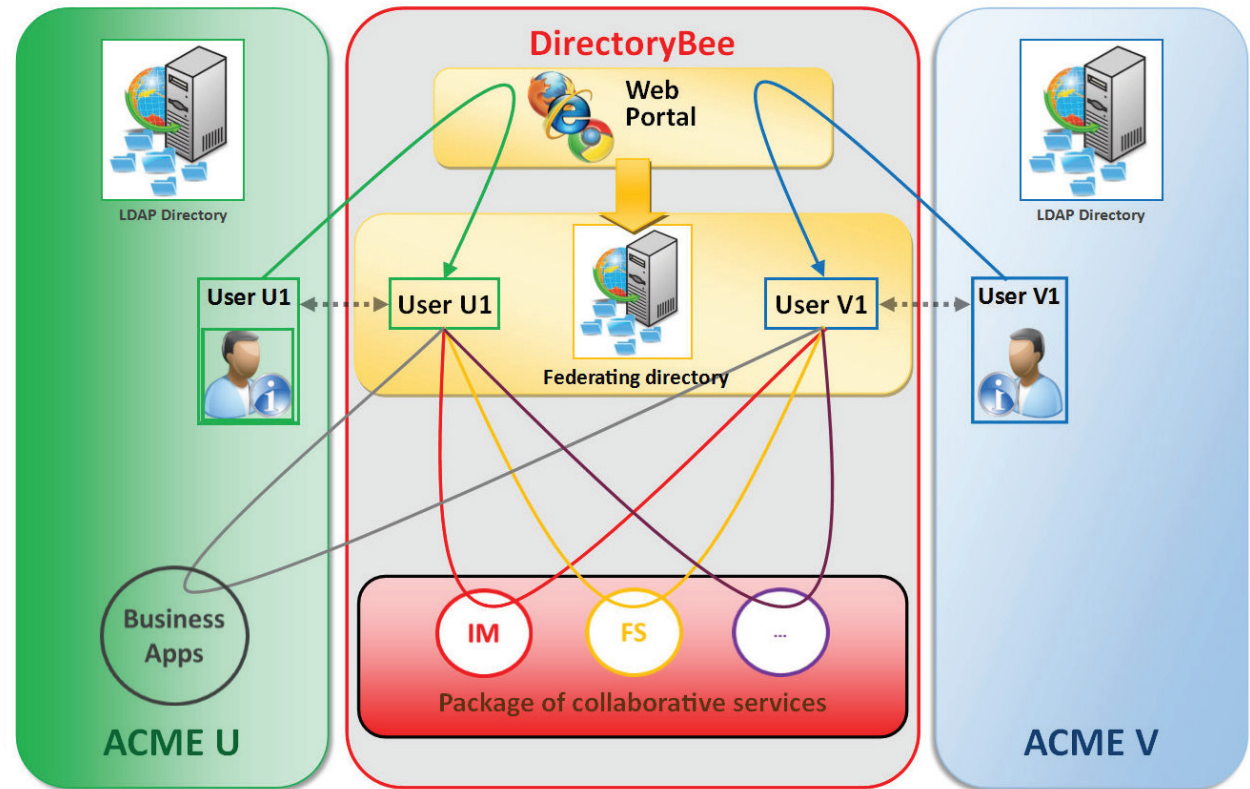

- » **Collaborative interaction** between the users of different organizations e.g. services, departments, subsidiaries, business partners, etc.
- » **Single LDAP authentication** of the user with the usual account, and a seamless process for the user.
- » **Your applications** can be **accessed by users outside of the organization.**
- » **A simple and automatic administration.**

## A WORD FROM OUR CLIENT

**“WE** appreciate Apitech's ability to quickly handle complex LDAP-related technologies and Mozilla Thunderbird clients. Their input in terms of directory federation, telephone synchronization or web interface integration cannot be denied ”

**Manager of Messaging Systems at the French Ministry of Environment, Sustainable Development and Energy**
